

Features & Specification

This semiautomatic Pallet Strapper is the latest automatic strapping equipment developed by our company specially for handling large-sized stackplate wrapped articles. This product features stable performance, a high efficiency and energy conservation capability, a strong construction, excellent durability, etc.;

Applications

Shortcomings associated with packing large-sized stack-plate wrapped articles, such as low speed in bundling, poor effect in bundling, etc., Can be overcome by using this machine. The machine can effectively increase both the efficiency and effect in packing cargo. Stack-plates can be transported in an easier and safer manner once they are packed with the machine. The machine can be widely used in many fields including production, trade, business, etc.;

Specification

Dimension	W1872 x D550 x H1536mm when sword is down
Weight(net.)	150kgs
Power	1Phase, 110V/230V, 50/60Hz to be specified
Strap	Polypropylene
Strap width	12 mm
Strap Dispenser	200 mm
Electric Consumption	0.5KVA
Sealing Point	542mm H. Height from floor
Min.Package Height	550mm H. Height from floor
